MyTower TMS Invoice Tower

Optimize Your Costs and Manage Your Expenses

Control Your Expenses and Optimize Your Costs

Our transport billing control solution, Invoice Tower, integrated into our Transportation Management System (TMS) and also available as a standalone solution, provides a comprehensive solution to ensure the accuracy and reliability of transport costs. Automated invoice verification is a key aspect of our solution, helping to avoid billing errors and resulting in substantial financial savings.

Moreover, with its cost calculation engine, Invoice Tower allows you to accurately track and control your transport costs, cost element by cost element. The breakdown feature also enables the allocation of transport costs to shipment items, refining your cost prices. The Provision module of Invoice Tower enables you to manage end-of-month provisions by calculating the costs of non-invoiced transport.

By offering increased visibility into transport costs, it facilitates informed decision-making in cost management and negotiations with carriers. With our integrated billing control solution, businesses can optimize their transport-related finances while benefiting from transparent, accurate, and efficient invoice management.

Advanced features such as real-time tracking of transport expenses provide companies with a clear and detailed view of their logistic costs. This significantly facilitates informed decision-making in cost management, allowing for the optimization of allocated transport budgets. Furthermore, this enhanced visibility also enables more effective negotiations with carriers, based on precise and reliable data.

Precision and Reliability:

- **Verify and validate** invoices from carriers and logistic service providers to ensure accuracy and reliability.
- **Check consistency** between billed amounts and actual provided service levels, reducing discrepancies.
- **Minimize billing errors and overpayments** by implementing our Invoice Tower solution.
- Manage transport cost provisions and allocate these costs to transported items.

Achieve Financial Savings:

- **Ensure** the application of negotiated rate structures with your carriers.
- **Identify** billing errors, duplicates, or incorrect charges using the robust capabilities of Invoice Tower, enabling you to achieve significant savings.

Automate Your Control Processes:

- **Simplify and automate** your invoice verification processes, saving time and enhancing operational efficiency.
- **Centralize and consolidate** all billing-related information in Invoice Tower, facilitating payment management and various validation steps.

Visibility and Transparency:

- **Gain increased visibility** into transport costs, billing discrepancies, and spending trends through detailed reports provided by Invoice Tower.
- **Leverage this visibility** to make **informed decisions** in cost management and **negotiate effectively** with your suppliers, enabling you to achieve better financial outcomes.

Why Choose Invoice Tower for Your Transportation Management?

❯ A Proven Solution: Invoice Tower is the trusted choice and essential partner for any company seeking to turn their billing control process into a performance lever.

❯ Transport and Information Systems Expertise: Benefit from our in-depth knowledge and expertise in both transport and information systems, ensuring a robust and comprehensive solution for your transportation needs.

❯ Powerful Integration Capabilities: Invoice Tower is a highly integrated tool that seamlessly integrates with all MyTower TMS solutions. Furthermore, it can be easily integrated with various ERP systems, providing a unified platform for efficient transportation management.

❯ Flexibility and Modularity: Customize the solution according to your specific needs with our flexible and modular approach. Choose the features that match your needs and expand the range of functionalities as your company grows and evolves.

❯ Scalable for All Businesses: Whether you are a multinational corporation or a small to medium-sized enterprise, our solution is designed to adapt to your needs, offering the same level of efficiency.

❯ Personalized Collaborative Processes: Benefit from personalized and collaborative processes that are easy to implement, ensuring seamless integration with your existing operations and promoting collaboration among stakeholders.

❯ Fast and Efficient Implementation: Our team of experts ensures a swift and efficient implementation of Invoice Tower. The solution is available in a generic version, ready for quick deployment. Additionally, upon request, our dedicated R&D departments can customize the solution to meet your specific needs.

❯ Immediate Return on Investment (ROI): By digitizing your transportation operations with Invoice Tower, you unlock operational efficiency gains, improve visibility, optimize operational management, and enhance customer satisfaction, resulting in immediate and tangible returns on your investment.

Unlock cost savings, streamline your operations, and gain full control over your transportation invoices.

Associated Professional Services

Integration Excellence:
Our expert integration team ensures a seamless configuration of the Invoice Tower solution, tailored to your specific needs, providing optimal functionality right from the start.

SaaS Deployment: Enjoy the benefits of Software as a Service (SaaS) deployment, reducing installation costs and receiving constant updates. Benefit from increased flexibility, robust security, while maximizing the efficiency of your carbon management.

Continuous Support:
Our dedicated support teams remain at your service even after implementation, addressing any questions or concerns that may arise, ensuring a smooth and uninterrupted experience.
Business process outsourcing:
Teams capable of managing your operations as part of process delegation.
